Wellcorps International Releases Breakthrough Multi-Benefit WellCapAM™ Activation Complex

SAN FRANCISCO, CA – Following an overwhelmingly successful launch to healthcare practitioners over the past year, Wellcorps International, the leading innovator of multi-benefit health and wellness dietary supplements has announced its revolutionary WellCapAM™ Activation Complex is now available to the general public.

WellCapAM is a synergistic combination of 24 nutrients, antioxidants, and adaptogens that have proven in clinical studies to assist in promoting, maintaining and supporting cardiovascular health, respiratory and immune system health, optimum blood sugar levels, metabolic stimulation and appetite reduction.

“We designed WellCapAM to be your body’s feel-good, energy-plus formula for the entire day,” said Wellcorps CEO Tony Rich. “Most people experience a noticeable difference within the first 30 minutes of taking WellCapAM. Within the first couple of days they realize they are more alert, eating less and adding more activities to their daily routine.”

Combining the latest advancements in delivery, absorption and efficacy, WellCapAM’s multiple benefit formulation includes exclusive extracts and organic botanicals that have been shown to lift the body’s energy system, support increased circulation, reduce oxidative stress on cardiovascular tissues, provide powerful anti-oxidants to protect heart and vessel tissues, support more efficient absorption of dietary fats, and assist in removal of environmental toxins.

Physicians utilizing WellCapAM in their practices have reported excellent results with their patient’s increased energy without the traditional adrenal-depleting qualities of other energy-boosting supplements. WellCapAM users have also reported reduced joint pain and stiffness, increased circulation in extremities, reduced appetite and decreased belly fat.

“WellCapAM’s unique formulation provides balancing adaptogenic herbs and essential nutrients that relieve stress, increase energy and improve performance,” said Dr. Sally LaMont, ND, LAc. “It’s excellent support in today’s busy world.”

WellCapAM is available at selected retailers and on the Wellcorps International website, www.wellcapam.com. The website also provides complete product information, list of ingredients, and associated science and clinical trial data.

About Wellcorps International
